

# Attention Anglers

## New Smallmouth Bass tagging study underway on Lake St. Clair:

The Michigan Department of Natural Resources is conducting an acoustic tagging study on Smallmouth Bass in Lake St. Clair. The goals of this study are to better understand Smallmouth Bass distribution through the lake, habitat use, survival and ultimately to ensure the continued sound management of this world-class resource. Anglers are asked to be on the lookout for these and other tagged fish.

### If you catch a tagged fish:

- 1) Note tag number, date/time and location of capture
- 2) Please **do not** remove external tag if you release the fish
- 3) If you harvest the fish, please keep the tags
- 4) Report your tag numbers

**Report tagged fish to:**  
**[www.michigan.gov/taggedfish](http://www.michigan.gov/taggedfish)**
